

Abstract of the Disclosure

The invention disclosed consists of a process that consists of the steps capturing and collecting digital images of original art works, sorting those images into working sets or

5 groupings, distributing and displaying the digital imagery of the sets or groups in a number of commercial venues and private residences via a slide show utilizing high-resolution video media including television sets and projection onto walls or screens. This process will serve to 1) expose artists' works to a broad audience widely distributed throughout a broad geographic area, 2) entertain its audience; and 3) introduce that audience to dazzling new 'high-definition' displays,

10 generally defined as having XGA resolution or higher.
